Value of Small Banks

“"We document that small businesses with better access to small banks are less prone to experiencing financing difficulties (getting access to loans)....and during the recent financial crisis, more access to small bank finance mitigated the effects of credit rationing by large banks experiencing funding liquidity shocks....small banks still serve a valuable role in alleviating financial constraints for small businesses, particularly during period of economic and financial distress, so that the decline in the presence of these banks may impose a social cost”.

March 7, 1933

Secretary of the Treasury

Washington, D. C.

We are the only bank in this community and have over three million dollars deposits. On March tenth we wish to issue small denominations of unsecured bearer certificates, to depositors wishing to split up their balances. To be issued in substantially the following form:

"This certifies that the bearer has blank dollars on deposit in the Baker-Boyer National Bank payable in accordance with any regulations established by the Secretary of the Treasury governing the payment of bank balances on deposit prior to the bank holiday proclaimed on March sixth, Nineteen Hundred Thirty Three."

We believe these certificates will supply the community with a temporary medium of exchange and be entirely acceptable to the business interests here.

Please wire immediately if above will be allowable or suggest approved wording.

Baker-Boyer National Bank
Value of Small Banks

“...It is possible that some of the loans to small businesses by small banks could result in the finding of negative net present value (NPV) investments, which could lead to sharper fluctuations in economic conditions over time... We show that the greater small bank market shares may result in some IMPROVEMENTS in local economic outcomes, alleviating concerns that additional small business lending by small banks is used to fund negative NPV.”

Challenges for Small Banks

• “The historic advantage community banks have had in making small business loans was their ability to leverage “soft” information like knowledge of a businesses’ cash flow from lock box and checking account relationships to make sound small business loans. Now community bank competitors have developed technology that more efficiently uses multiple sources of information to make speedy lending decisions, greatly reducing the competitive advantage of the type of information community banks have about their customers. The technology also reduces the involvement of lending staff which reduces the cost of making these loans.”

Debt Strategies That Work

- Achieving target pricing per case is a very high priority
- Work the markets to improve mix of retail/wholesale sales
- Avoid growing so fast that you have to discount pricing through post-offs
What Is The Most Important Question?
